

Safety Alert!

Predatory Drugs

Incident: On October 19, 2014 it was reported to Campus Safety that on Friday night October 17, 2014 a student may have had an unknown substance dropped in her drink by an unknown subject while at a bar in downtown Saratoga. She stated her beverage was left unattended for a brief period of time and later that evening she became somewhat disorientated and believes she blacked out. This act constitutes a FELONY assault and police are investigating. The use of predatory drugs is illegal and creates a significant risk of serious injury, possible death and exposure to sexual assault.

Prespecially when combined with alcohol.

Effects: When mixed with alcohol various effects include: respiratory distress, long term memory loss, confusion, nausea, blackouts, seizure, unconsciousness, coma and possible death.

Safety Tip: These drugs come in various forms including liquid, powder and tablets and are difficult to detect.

DO NOT:

- Leave beverages unattended
- Drink from a common container
- Drink from a container that was not opened by you
- Attend or leave any party with a stranger
