

**Curriculum Committee  
Faculty Meeting  
October 3, 2008**

**MOTION**

The Curriculum Committee moves to eliminate the Economics-Mathematics interdepartmental major.

Rationale: The Economics-Mathematics major as currently defined is equivalent to a minor in Economics and a minor in Mathematics. These departments recommend that at least one discipline be studied in-depth and now advise that students consider one major one minor from these two disciplines (or a double major).
